3 Usage
    Slides with code
    Images with a source

4 The End

Setup

Setup

- Change into your working directory
- Clone the repo into the **theme** folder
- Install requirements
- Customize the theme via the `config.json`
- Build it with `rake default`

Configure colors in `src/config.lua`. Hex color codes are used.

Mandatory colors

- Primary
- Secondary
- Accent
- Background

Features

Key Features Overview

- Auto-generate contrast colors if not specified in the config
  - Recompile the presentation with `LuaTeX`
- Follows material design guidelines
- Adjustable Side-By-Side layouts
- Isolated build-process – no local dependencies except docker

Adjust ratio of the layout with the optional parameter. Defaults to half of the page.

Right Side

Left Side

Right Side
A very important statement

$$a^2 + b^2 = c^2$$

Usage

Explaining how things work

Usage

Code

```
def someFunction(x):
        return x*2

someFunction(2)
```

Including Images

Figure: Tensorflow logo

Source: Google.com

The End

Thanks for all the fish!
