Material Design

Max Mustermann

January 21, 2020

Overview

Setup

Setup

- Change into your working directory
- Clone the repo into the **theme** folder
- Install requirements
- Customize the theme via the `config.json`
- Build it with `rake default`

```json
{
    "primaryColor": "#2196F3",
    "primaryColorLight": null,
    "primaryColorDark": null,
    "primaryTextColor": null,
    "secondaryColor": "#FAFAFA",
    "secondaryColorLight": null,
    "secondaryColorDark": null,
    "secondaryTextColor": null,
    "accentColor": "#80D8FF",

    "backgroundColorShadow": "#000000",
    "backgroundColor1": "#E0E0E0",
    "backgroundColor2": "#F5F5F5",
    "backgroundColor3": "#FAFAFA",
    "backgroundColor4": "#FFFFFF"
}
```

Mandatory colors

- Primary
- Secondary
- Accent
- Background

Features

- Auto-generate contrast colors if not specified in config
  - Re-apply style changes with `rake default`
- Follows material design guidelines
- Adjustable Side-By-Side layouts

Adjust ratio of the layout with the optional parameter. Defaults to half of the page.

Right Side

Left Side

Right Side
A very important statement

$$a^2 + b^2 = c^2$$

Usage

Code

```python
def someFunction(x):
        return x*2

someFunction(2)
```

Figure: Tensorflow logo

Thanks for all the fish!
